

Il diagramma illustra la struttura di un pannello di isolamento termico, suddiviso in sei strati orizzontali. A sinistra, una scala verticale indica le spessori in metri: 0,04 per lo strato superiore, 0,10 per il secondo strato, 0,20 per il terzo strato, e 0,10 per il quarto strato. I due strati inferiori non hanno valori numerici fissi, ma sono indicati come "Variabile" con una scala da 0,15 a 0,15. A destra, le etichette identificano gli strati: "Tappetino d'usura" (strato superiore), "Conglomerato bituminoso" (secondo strato), "Sottofondo" (terzo strato), "Materiale arido di cave" (quarto strato), "pabbio" (quinto strato) e "Tube in GHSA SFEROIDALE" (sesto strato, rappresentato da un cerchio). Una scala orizzontale in basso indica la larghezza dei tubi, variabile da 0,15 a 0,15.

Pianta

Technical drawing of the plant (Pianta) showing a top-down view of the circular structure. The drawing includes dimensions: 1,60 (total width), 0,30 (left margin), 1,20 (inner width), and 0,30 (right margin). The structure is labeled with 'A' and 'B' at the corners. A central instrument port is labeled 'presso per strumenti o idrante'. A ladder access point is labeled 'scala'.

Pianta copertura

Technical drawing of the plant cover (Pianta copertura) showing a top-down view of the circular structure. The drawing includes dimensions: 1,60 (total width), 0,30 (left margin), 1,20 (inner width), and 0,30 (right margin). The structure is labeled with 'A' and 'B' at the corners. A central instrument port is labeled 'presso per strumenti o idrante'. A ladder access point is labeled 'scala'. The cover is labeled 'chiusura ingresso pozzi diam 100'.

Sezione AA

Technical drawing of the section AA (Sezione AA) showing a cross-section of the structure. The drawing includes dimensions: 1,00 (total width), 0,30 (left margin), 0,30 (right margin), and 0,30 (bottom margin). The structure is labeled with 'A' and 'B' at the corners. A central instrument port is labeled 'presso per strumenti o idrante'. A ladder access point is labeled 'scala'.

Sezione BB

Technical drawing of the section BB (Sezione BB) showing a cross-section of the structure. The drawing includes dimensions: 1,00 (total width), 0,30 (left margin), 0,30 (right margin), and 0,30 (bottom margin). The structure is labeled with 'A' and 'B' at the corners. A central instrument port is labeled 'presso per strumenti o idrante'. A ladder access point is labeled 'scala'.

The technical drawings illustrate the 'Cassa di manovra' (maneuver box) in four views:

- Pianta (Top View):** Shows the square base with a central circular access point. Dimensions include a total width of 1.80m and a central circle diameter of 1000mm. Labels include 'pietra per strumenti o idranti' (stone for tools or fire hydrants) and 'chiusino ingresso pozzetto diam. 100' (100mm diameter inlet valve).
- Pianta copertura (Cover Top View):** Shows the top cover with a central circular opening. Dimensions include a total width of 1.80m and a central circle diameter of 1000mm. Labels include 'ASSE TURBO' (turbo shaft) and 'chiusino ingresso pozzetto diam. 100' (100mm diameter inlet valve).
- Sezione AA (Section AA):** A vertical cross-section showing the internal structure, including a central vertical pipe and a horizontal pipe. Dimensions include a total height of 1.00m and a central pipe diameter of 100mm. Labels include 'pietra per strumenti o idranti' (stone for tools or fire hydrants) and 'chiusino ingresso pozzetto diam. 100' (100mm diameter inlet valve).
- Sezione BB (Section BB):** A vertical cross-section showing the internal structure, including a central vertical pipe and a horizontal pipe. Dimensions include a total height of 1.00m and a central pipe diameter of 100mm. Labels include 'pietra per strumenti o idranti 2 Ø 50 mm.' (stone for tools or fire hydrants 2 Ø 50 mm.) and 'chiusino ingresso pozzetto diam. 100' (100mm diameter inlet valve).

The technical drawings illustrate the 'Pozzo a secco' (dry well) design. The top view, labeled 'Pianta copertura', shows a square structure with a central circular opening of 1000 mm diameter. The side view, labeled 'Sezione BB', shows the vertical profile with a total height of 1.60 m and a base width of 0.30 m. The cross-sections, labeled 'Sezione AA' and 'Sezione BB', show the internal structure, including the 'ASSE TUBO' (tube axis) and the 'chiusino ingresso pozzetto' (well inlet closure). The drawings also indicate the 'presa per strumenti o sfiante' (instrument or vent connection) and the 'diam 100' (100 mm diameter) of the central opening.
